

Carbon Reduction Plan

Date: 4th August 2025

Commitment to achieving Net Zero

Exotopic Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

This is the first year that Exotopic Ltd is measuring its carbon emissions and the emissions reported for the Financial year ended 31/01/2025 below will serve as the baseline. Exotopic Ltd are putting methods in place to increase the accuracy of carbon emissions measurements.

Baseline Year: 2025

Baseline year emissions:

Current Emissions Reporting

The year 01/02/2024 - 31/01/2025 is the first year of emissions reporting and it is used as the baseline reporting.

We are a professional services company. We do not sell, transport or distribute products.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1295 tCO₂e by 2028. This is a reduction of 10%. This percentage takes into account that Exotopic Ltd is expecting to expand rapidly both in output and personnel numbers in the next 5 years.

Carbon Reduction Projects

Project 1: Decreasing travel of employees by promoting homeworking. Employees use public transport wherever possible. Decreasing international travel

Project 2: Engage with the landlord to encourage use of green energy suppliers and renewable energies in the future.

Project 3: Work with our suppliers to increase the amount of recycled material used in the products we purchase from them. Moving to suppliers with higher use of recycled material.
